

POWERING STUDENT SUCCESS IN CTE

The MILearner Wallet is coming to CSI, TSI, and ATS-identified schools in the 2025–2026 school year – supported through the Technical Assistance Grant (TAG) and with additional opportunities to leverage Regional Assistance Grant (RAG) funds.

WHY THIS MATTERS FOR CTE

Showcase Industry-Recognized Skills

- MILearner Wallet allows students to securely store and share CTE certifications, credentials, and technical achievements – ensuring their hard-earned skills are visible and verifiable.

Connect Students to Careers

- MILearner Wallet bridges the gap between classroom training and the workforce, helping employers quickly recognize a student's readiness for technical roles.

Support Postsecondary Opportunities

- Students can share their digital portfolio with colleges, apprenticeships, and employers, creating a seamless pathway from CTE programs to future opportunities.

WHY ACT NOW

This initiative will be supported through TAG funds, with additional opportunities to leverage Regional Assistance Grant (RAG) resources to further enhance activities designed to increase student achievement – schools and CTE programs have a time-sensitive opportunity to put the MILearner Wallet into action and give students an advantage in both education and the workforce.
