PROFESSIONAL LEARNING
& DIGITAL CREDENTIALS
ISSUE, TRACK, & REPORT

MILEARNER WALLET

Why ISDs are Choosing MILearner Wallet

A secure, portable record of credentials and professional learning for ISD staff

Manage Staff Credentials and SCECHs
Reduce manual tracking by replacing spreadsheets and duplicate processes with one system to manage staff credentials and SCECHs.

Real-time Visibility
Real-time visibility into professional development participation and credential attainment across the organization.

Secure, Portable Credentials
Credentials are stored in a secure digital wallet that staff can access and share as roles change or documentation is needed.

Why Act Now

With TAG funds available, ISDs can implement MILearner Wallet for their staff and establish a sustainable system for issuing and managing credentials—without placing additional strain on administrative teams.
